Hiring Manager

Hiring Team

PT Hubexo Asia Indonesia

Dear Hiring Team,

At month-end close, a broker's fees were calculated wrong. We traced it to an integration field mapping, fixed the configuration, and wrote the runbook. I have not configured Chargebee itself, and I will not pretend otherwise. What I bring is eleven years of owning the money path end to end.

Solution architect with eleven years designing and running billing, payment, and business systems across fintech and e-commerce: Wirecard payment gateway integrations for 14,000+ corporate clients, two end-to-end ERP implementations with legacy data migration, and subscription-ready payment flows on Srabutan.com. Deep API integration and data governance discipline.

Key achievements I'd bring to this role:

- Eleven years owning billing and payment systems for six global brokerage platforms, including Wirecard gateway integrations
- Delivered two end-to-end ERP implementations: legacy data migration, UAT, go-live
- Led small technical teams and coordinated external vendors across multi-country engagements

I'm particularly excited about the opportunity to work on subscription billing and business systems. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan

Solution Architect - Subscription Billing & Business Systems
