Hiring Manager

Hiring Team

PT Surya Semesta Internusa Tbk

Dear Hiring Team,

At 2 AM on a Sunday, a trading platform went down and a broker's clients were frozen mid-transaction. The vendor said, check on Monday. I did not accept that answer: I traced the fault to a database deadlock and brought the system back before the Asian session opened. For eleven years that was my job, Level 2 support measured in real money. The discipline transfers exactly to your business applications.

IT application officer with eleven years managing business-critical application lifecycles across six international brokerage platforms: Level 2 support, root cause analysis, vendor coordination, and backup and recovery discipline. Five years of ERP implementation including two end-to-end enterprise rollouts, with deep SQL across SQL Server and MySQL. Recently shipped AI-powered e-commerce applications, automating business processes the way this role's final responsibility describes.

Key achievements I'd bring to this role:

- Ran Level 2 application support for six global brokerage platforms (Pepperstone, TitanFX, FXCM, LiquidityConnect, Traderscolo VPS, BaxiaMarkets) for eleven years: troubleshooting, root cause analysis, vendor coordination, and recovery under real-money pressure
- Delivered two end-to-end ERP and enterprise system implementations across five years of ERP work, from requirements gathering and UAT through go-live and post-implementation support
- Maintained application documentation, user access controls, and audit-compliant IT policies across multi-platform, multi-vendor operations
- Modernized business processes with AI and automation: n8n and Python workflows cut manual processing by 70 percent

I'm particularly excited about the opportunity to work on cirt services: 11 years of application support and lifecycle management across 6 broker platforms. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan
