Hiring Manager

Hiring Team

PT Surya Semesta Internusa Tbk

Dear Hiring Team,

At 2 AM on a Sunday, a trading platform went down and a broker's clients were frozen mid-transaction. The vendor said, check on Monday. I did not accept that answer: I traced the fault and brought the system back before the Asian session opened. Eleven years of Level 2 support, measured in real money.

IT application officer with eleven years managing business-critical applications across six international brokerage platforms: Level 2 support, root cause analysis, vendor coordination, and backup and recovery discipline. Five years of ERP implementation including two end-to-end rollouts, with deep SQL. Recently shipped AI-powered applications that automate business processes.

Key achievements I'd bring to this role:

- Eleven years of Level 2 support for six global brokerage platforms: root cause analysis and recovery under real-money pressure
- Delivered two end-to-end ERP implementations: requirements, UAT, go-live, and post-implementation support
- Maintained application documentation, user access controls, and audit-compliant IT policies

I'm particularly excited about the opportunity to work on business-critical applications. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan

IT Application Officer - ERP & Business Applications
