Hiring Manager

Hiring Team

PT Trimitra Putra Mandiri (TPM Group)

Dear Hiring Team,

Most AI initiatives in a large group do not fail because the tools are weak. They fail because nobody mapped the work first. The tools arrive, the mandate arrives, and in between, a department is still retyping data into three systems. That gap is where I operate. Across 11 years in technology operations I have done what this role describes: sat with teams, found where the hours leak, and rebuilt those workflows for good. I build with n8n, Python, and modern LLM tools daily; my automation work has cut manual processing by around 70 percent. I have taken AI use cases from proof of concept to production: evaluation, rollout, documentation, and the training that makes adoption stick. I spend my weeks teaching non-technical people to work with AI. I have delivered training across six platforms, from executives to front-line staff, and I know that adoption is a change-management problem wearing a technology costume. TPM Group runs five companies of process-heavy operations, where the right automations pay for themselves quickly. I would start the way the role demands: walk the workflows, ship small wins fast, and measure the impact in hours and rupiah. I would welcome the opportunity to discuss how I can help TPM Group make AI practical instead of theoretical. Warm regards, Bio Lumbantoruan

Warm regards,

Bio Lumbantoruan
