Hiring Manager
Hiring Team
Flintex Consulting Pte Ltd

Dear Hiring Team,

I have not run a contact center support team, and I want to be direct about that. What I have done for eleven years is keep live financial platforms running around the clock: monitoring production in a 24-hour market, triaging incidents, digging through application and SQL Server logs to find root cause, and protecting client trust under SLA pressure. That is the same discipline this role demands: deep technical hands, leadership, and the judgment to balance customer advocacy with business objectives.

Technology professional with 11 years of experience leading live production operations and building enterprise systems across fintech and SaaS. Hands-on engineer with strong Java, SQL Server, and web fundamentals who has led teams in 24-hour global markets, driven incident triage and root-cause analysis from application and database logs, and maintained client trust through clear communication and reliable delivery. Skilled at mentoring engineers, enforcing SLA compliance, and explaining complex technical issues to non-technical stakeholders in fast-paced, multi-timezone environments.

Key achievements I'd bring to this role:

- Led trading operations at CITT Services for 11 years, managing real-time market monitoring and risk exposure across MT4/MT5 and oneZero platforms in a 24-hour global market
- Delivered consulting for Pepperstone, TitanFX, BaxiaMarkets, Funded Prop BX, Traderscolo, and Liquidity Connect, building lasting client trust through weekly engagements and reliable delivery
- Built and maintained production systems with Java, Spring, PHP/Laravel, React, and Vue, troubleshooting incidents from application logs, SQL Server logs, and error logs to root cause
- Engineered payment gateway integrations at Wirecard connecting banking systems for 14,000+ corporate clients across 69 countries under strict PCI-DSS compliance

I'm particularly excited about the opportunity to work on srabutan.com - full-stack freelance marketplace with ai-powered matching, architected and led end-to-end with docker, github actions, and railway. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan
