Hiring Manager
Hiring Team
Flintex Consulting Pte Ltd

Dear Hiring Team,

I have not run a contact center support team, and I want to be direct about that. For eleven years I have kept live financial platforms running around the clock: triaging incidents, digging through application and SQL Server logs, and protecting client trust under SLA pressure.

Technology professional with 11 years of experience leading live production operations across fintech and SaaS. Hands-on engineer with strong Java, SQL Server, and web fundamentals who has led teams in 24-hour global markets and driven root-cause analysis from application logs. Skilled at mentoring engineers, enforcing SLA compliance, and explaining technical issues to non-technical stakeholders.

Key achievements I'd bring to this role:

- Led trading operations at CITT Services for 11 years, managing risk and market monitoring across MT4/MT5 and oneZero
- Delivered consulting for Pepperstone, TitanFX, BaxiaMarkets, Traderscolo, and Liquidity Connect, building lasting client trust
- Built production systems with Java, Spring, Laravel, React, and Vue, troubleshooting application and SQL Server logs to root cause

I'm particularly excited about the opportunity to work on srabutan.com - full-stack freelance marketplace with ai-powered matching, architected and led end-to-end with docker, github actions, and railway. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan
