Hiring Manager

Hiring Team

Elitez Pte Ltd

Dear Hiring Team,

A system goes live twice. The first time is when the vendor finishes configuring it. The second, the one that counts, is when the customer's teams trust it enough to leave their spreadsheets behind. The distance between those moments is where an implementation consultant earns their keep. I have spent my career on that distance. I have delivered end-to-end ERP implementations, including two full rollouts and a legacy data migration, owning requirements, solution mapping, data loading, UAT, and go-live support. I work daily in SQL Server and MySQL, and I have built and debugged integrations between platforms and external systems using REST APIs, XML, and payment gateways. The toolkit in this role is my working toolkit: SQL for migration and troubleshooting, REST APIs for integration, regular expressions for data cleaning. I also build web applications with JavaScript and TypeScript in my own projects, so platform configuration holds no fear for me. My customer-facing experience is equally direct: 11 years supporting corporate clients across six trading platforms, where clear communication with technical and business stakeholders was the job, not a bonus. I would welcome the opportunity to discuss how I can help your customers get their platforms live and adopted. Warm regards, Bio Lumbantoruan

Warm regards,

Bio Lumbantoruan

Technical Consultant - ERP / PLM
