Hiring Manager
Hiring Team
Flintex Consulting Pte Ltd

Dear Hiring Team,

At CITT Services I led frontend and technical support for six brokers, including TitanFX, FXCM, LiquidityConnect, and Pepperstone. I managed multiple support teams, trained them, and built a continuous improvement system. That is the role you are hiring for.

Technology professional with 11 years of experience leading technical support and live production operations across fintech. Served six brokers, including TitanFX, FXCM, and Pepperstone, as frontend and technical support, managing multiple teams and delivering training. Hands-on engineer with strong Java, SQL Server, and web fundamentals who drives root-cause analysis and explains complex issues to non-technical stakeholders.

Key achievements I'd bring to this role:

- Led frontend and technical support for TitanFX, FXCM, LiquidityConnect, Traderscolo VPS, BaxiaMarkets, and Pepperstone
- Managed multiple support teams, delivered training, and built a continuous improvement system
- Built production systems with Java, Spring, Laravel, React, and Vue, troubleshooting application and SQL Server logs to root cause

I'm particularly excited about the opportunity to work on srabutan.com - full-stack freelance marketplace with ai-powered matching, architected and led end-to-end with docker, github actions, and railway. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan
