Hiring Manager

Hiring Team

IBMC

Dear Hiring Team,

For eleven years, I have supported trading platforms where the market set office hours: Sydney at dawn, London at midday, New York through the night. Pacific Time from Jakarta is no adjustment.

Technical support engineer with 11 years of high-tier support spanning 6 international brokerage platforms and cloud infrastructure. Deep experience in AWS, web development, programming logic, and network troubleshooting, with a production record of incident response and SLA adherence under real-money pressure. Documentation discipline, data-driven feedback loops, and professional English.

Key achievements I'd bring to this role:

- Led technical support for 6 global brokerage platforms for 11 years at CITT Services, enforcing SLAs for enterprise clients
- Triaged live production incidents, including overnight payment gateway outages, restoring service within SLA
- Automated support and onboarding workflows, reducing manual processing by 70% and feeding customer pain points back to engineering

I'm particularly excited about the opportunity to work on ibmc's bali saas client, where eleven years of cloud support experience applies directly. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan

Senior Technical Support Engineer - Cloud & SaaS
