Hiring Manager

Hiring Team

PT Radana Bhaskara Finance Tbk

Dear Hiring Team,

When a broker asked TitanFX for a new feature for its Asia markets, the person who understood the need best was not the vendor; it was me. I mapped the process from front office to settlement, wrote the specification, ran UAT with the users, and the feature went live before the quarter ended. For eleven years at CITT Services that was my job: the bridge between business units and the IT team.

Requirements analysis, process mapping, gap analysis, documentation, UAT, and the honest recommendations that made systems better. Radana Bhaskara Finance asks for three to five years of IT Business Analyst experience and an understanding of pembiayaan business processes. I have the first in depth. The second I will be honest about: I have never worked inside a multifinance company. What I bring instead is eleven years of systems discipline inside regulated financial services, anti-fraud, AML, and KYC through Sumsu, and five years of ERP implementation including two end-to-end rollouts. I also live in JIRA. Financing companies run on trust in their data. My career has been spent making financial data trustworthy. I would welcome the chance to map your processes and show you where the systems can improve.

Warm regards,

Bio Lumbantoruan

IT Business Analyst - Multifinance Systems
