Hiring Manager

Hiring Team

PT Hubexo Asia Indonesia

Dear Hiring Team,

At month-end close, a broker's fees were calculated wrong. We traced it to an integration field mapping, fixed the configuration, and wrote the runbook so it could never happen again. That is the daily reality of owning the money path, and I have owned it for eleven years.

Hubexo is looking for someone to design, implement, and continuously improve its Chargebee solution across Finance, Sales, Marketing, and Product. I have not configured Chargebee itself, and I will not pretend otherwise. What I bring is the harder half of the job: billing and payment systems that must be right the first time, every time. Payment gateway integrations for 14,000+ corporate clients across 69 countries, two end-to-end ERP implementations with legacy data migration, and subscription-ready payment flows on Srabutan.com with Xendit.

The rest of the JD is work I have done under pressure: translating business requirements into scalable configuration, API integrations and troubleshooting, data governance, documenting solution architecture and runbooks, and leading a small technical team with external vendors. Subscription billing is a new platform to me; the discipline it demands is not.

I would welcome the opportunity to discuss how I can own your Chargebee solution end to end.

Warm regards,

**Bio Lumbantoruan**

Solution Architect - Subscription Billing & Business Systems
