Cherry Delfina Setiawan
Recruiter
Elitez Indonesia

Dear Cherry,

I have never worked inside a recruitment agency. I want to be direct about that, because you deserve a candidate who leads with honesty. What I do have is eleven years of experience being the person companies trust to understand what they need and find the right fit: as a senior technology consultant for brokers including Pepperstone and TitanFX, as a leader who built and managed teams, and as the architect of an AI-powered matching system that connects professionals with the right projects. Recruitment at its core is understanding needs, evaluating people accurately, and building trust. That is precisely what I have done for a living since 2014.

Technology professional with 11 years of client-facing consulting experience across fintech, e-commerce, and SaaS, focused on talent and recruitment. Deeply familiar with the hiring landscape from both sides of the table: evaluating technical talent, leading and building teams, and understanding what companies genuinely need before they hire. Fluent in English, an expert user of LinkedIn and JobStreet, and technically fluent enough to source and screen IT and digital candidates at a depth most recruiters cannot match. Combines genuine relationship-building instincts with the discipline of a consultant who has juggled multiple high-stakes engagements and deadlines for over a decade.

Key achievements I'd bring to this role:

- Delivered consulting for Pepperstone, TitanFX, BaxiaMarkets, Funded Prop BX, Traderscolo, and Liquidity Connect over 11 years, translating complex client needs into the right solutions and the right people
- Led trading operations at CITT Services, balancing risk exposure, hedging strategy, and market monitoring across MT4/MT5 and oneZero platforms while managing multiple engagements against tight deadlines
- Architected the AI-powered matching system for Srabutan.com, a freelance marketplace that connects professionals with the right projects, applying talent-matching principles in production
- Built automated job-hunting and candidate-tracking pipelines using kanban workflows and JD extraction, mastering LinkedIn and JobStreet as a power user
- Fluent in English and Indonesian, confident in professional settings, communicating with clients across Europe, Southeast Asia, and Australia

I'm particularly excited about the opportunity to work on srabutan.com - ai-powered freelance marketplace with professional matching, real-time collaboration, and secure payments. My architecture

philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan
