Hiring Manager

Hiring Team

PT Hubexo Asia Indonesia

Dear Hiring Team,

At month-end close, a broker's fees were calculated wrong and the finance team caught it on a Friday afternoon. We traced it to an integration field mapping, fixed the configuration, and wrote the runbook so it could never happen again. I have not configured Chargebee itself, and I will not pretend otherwise. What I bring is eleven years of owning the money path end to end.

Solution architect with eleven years designing, implementing, and running billing, payment, and business systems across fintech and e-commerce: Wirecard payment gateway integrations for 14,000+ corporate clients, two end-to-end ERP implementations with legacy data migration, and subscription-ready payment flows on Srabutan.com. Deep API integration experience, data governance discipline, and a record of leading technical teams and external vendors.

Key achievements I'd bring to this role:

- Eleven years owning billing and payment systems for six global brokerage platforms, with Wirecard gateway integrations across 69 countries
- Delivered two end-to-end ERP implementations including legacy data migration, UAT, and post-go-live support
- Led small technical teams and coordinated external vendors across multi-country client engagements

I'm particularly excited about the opportunity to work on subscription billing and business systems transformation. My architecture philosophy centers on the fact that there are no right answers in architecture, only tradeoffs, and I make those tradeoffs deliberately, documented, and reversible.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Warm regards,

Bio Lumbantoruan

Solution Architect - Subscription Billing & Business Systems
